-

Communication

Excellent communication skills enable me to collaborate with clients, stakeholders, and cross-functional teams to deliver high-quality results.

Leadership

Coordinate project tasks, and implement best practices to ensure timely delivery of high-quality web applications.

Projects

Dukan Mkononi App

Written in Python-Django(backend) and Dart-Flutter(front-end). I haven't put it online yet. It's an idea I had and I made it. Is an application that will help the owner of the business to see the profit of his business, the use of employees, existing and sold products as well as the monthly report. The project is done and ready for presentation

JITAMBUE

This is an app developed using Django(back-end) and flutter (mobile ui)). I haven't put it online yet. It's an idea I had and I made it. Is an application that will help an individual to track his/her expenses together with income. Tracking your spending on a regular basis can give you an accurate picture of where you'd like it to go instead

FOREX CURRENCY CONVERTER WEB

This project developed using Django and Next js and is ready for showcase and presentation. I did this for intention to learn how to connect next js with backend

HARAKA HUB

This project is developed using Django(backend) and flutter for intention any grocery or hotels can use for delivering their products. Owners can see active orders and prepare delivery. and clients can see available products. The Django(back-end) is done but flutter ui is in last stage for it to be done

E-COMMERCE WEB

Developed for the intention to learn redux-toolkit. The web is developed using Django and react with redux toolkit as state management. The project is done and can be presented
